-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05-08-2007 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22-9, 11, 13-17, 20 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, there is no antecedent basis for "the minimum inner diameter".

In claims 3 and 14, there is no antecedent basis for "its compacted delivery state".

In claims 5, 9, 11, there is no antecedent basis for "said catheter".

In claim 7, there is no antecedent basis for "said first ring" and "its compacted delivery state".

In claim 13, there is no antecedent basis for "the minimum inner diameter of portions".

In claim 16, there is no antecedent basis for "the tubular stent".

In claim 17, it is unclear if the rings claimed are the same as those already recited, or additional ones.

In claim 20, there is no clear antecedent basis for "the ring" as more than one have been claimed.

In claim 22, there is no antecedent basis for "said step of displacing the stent distally of the sheath" and "the stent engaging step".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9,11-17,20 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Myler, et al.-5474563.

Myler discloses a stent delivery system having a delivery means consisting of an outer sheath 60 which surrounds the stent in a reduced configuration, and deployment means in the form of a core 52,56 having two enlarged rings 62,66 which are larger in diameter than the inner diameter of the stent (since elements 216 which engage the rings are part of the stent). A handle, one part of which is the proximal end of 60 and the

other part of which is attached to the proximal end of 52 and/or 56. The distal end of the outer sheath is an integral ring and could be used to assist compression of the stent.

Response to Arguments

Applicant's arguments filed 05-08-2007 have been fully considered but they are not persuasive.

The examiner contends that the distal end of the outer sheath is indeed an integral ring and would assist in stent compression of one so desired.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K. Dawson whose telephone number is 571-272-4694. The examiner can normally be reached on M-Th 7:30-5:00.
